

— CLOUD SERVICES —

The Cloud is a paradigm shift in the way IT resources are procured. However, one can easily get carried away with the hype. The Cloud is not the proverbial “SILVER BULLET” for IT woes. While at times, the Cloud may be the ideal solution, sometimes you just have to say NO!

Confidis has extensive experience in assisting organizations to make the Cloud journey.

Services

Cloud Strategy

The Cloud is not ONE SIZE FITS ALL. Some applications can go onto the Cloud while others are best kept in-house. Confidentiality of data, resource utilization, type of application etc. are some of the factors that determine suitability of an application for the Cloud.

Confidis can help you analyze your application portfolio and help you map your Cloud journey.

Cloud Implementation

All Cloud solutions are not equal. With the plethora of Cloud options available, you need an expert to evaluate and recommend the ones most beneficial to you.

Confidis can provide vendor neutral inputs, so that you come out a winner. We also work with partners to assist in actual implementation of our recommendations.

Cloud Security

Security is THE biggest inhibitor of Cloud adoption. Most CIOs/CISOs are skeptical (and rightfully so) about putting their organizations’ data on the Cloud.

Confidis can help you understand and mitigate Cloud risks so that your Cloud journey is a safe one.

Why Confidis?

We have been assisting organizations over the past 4 years with their Cloud journey. With deep skills in both traditional and Cloud technology, we can provide practical advice that can save you the blushes later.

Consultants from Confidis have worked with industry standards bodies like Cloud Security Alliance, ISC2 and Cloud Standards Customer Council to develop Cloud standards.

Keith Prabhu
Executive Director, Confidis

Chairman, Cloud Security Alliance - India RCB
